ALUMINIUM CLEANER

Cleans and restores wheels and older aluminium bodies

Aluminium Cleaner contains a blend of acids which have been specially developed to clean and brighten aluminium. Aluminium Cleaner contains a corrosion inhibitor to reduce the risk of damage to sensitive metals.

ADVANTAGES

- Removes the heaviest soils and corrosion.
- Corrosion inhibitor incorporated to prevent an attack on other metals.
- Rejuvenates finish.
- Powerful blend to reduce cleaning time.

TYPICAL APPLICATIONS

Cleans and restores wheels and older aluminium bodies where the finish required rejuvenating.

APPLICATION INSTRUCTIONS

Refer to Safety Data Sheet before using. Ensure all safe use and handling recommendations are implemented and all safety equipment is available and is used.

Dilute between 1:4 and 1:7 with cold water. Apply with long handled brush, starting at the bottom and working up.

Allow no longer than 5 minutes contact time, agitating periodically. Hose off with water.

Do not use on un-lacquered wheels, anodised aluminium, stainless steel or glass. Some lacquered alloy wheels maybe sensitive to acidic products, pre-test an inconspicuous area before application.
