Technical Data Sheet

F3 RESTORE - L720

Medium duty cutting compound

F3 Restore is a concentrated medium grade, highly uniform particle size compound. Low temperature solution for longer working times. Designed for high coverage with low dusting. Large working range allows rectification of scratching of 1500 grit marking down to final polishing of light swirl marks. Perfect for modern scratch resistant clear-coats

For perfect results use with Nielsen Revival Pad.

ADVANTAGES

Medium grade cutting, uniform particle size cutting compound

Removes scratches, paint defects and oxide film

Silicone, ammonia and filler free

TYPICAL APPLICATIONS

F3 Restore is suitable for use on steel, plastic, aluminium and composite bodywork. The silicone, ammonia and filler free formulation is ideal for use in body shops.

APPLICATION INSTRUCTIONS

MACHINE: Shake container before use.

Apply F3 Restore to the centre of a slightly dampened buffing pad. Spread the F3 Restore over the area to be treated on the lowest speed setting to prevent spattering.

Increase the speed and work the F3 Restore over the paint defect.

When the process is complete, wipe away residues with a soft dry cloth. Many operators prefer to apply polish directly over the dried film and remove both in one operation as it saves time and effort.
